Gebhardt, 2005 Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units is the 10th study in the Combat Studies Institute (CSI) Global War on Terrorism (GWOT) Occasional Paper series. This work is an outgrowth of concerns identified by the authors of On Point: The United States Army in Operation IRAQI FREEDOM. Specifically, these authors called into question the use of long-range surveillance (LRS) assets by commanders during that campaign and suggested an assessment ought to be made about their continuing utility and means of employment. This revision contains some important additional information the author received after this book was originally published Major (Retired) James Gebhardt, of CSI, researched and wrote this Occasional Paper with that end in view. In this study, Gebhardt surveys the US Army's historical experience with LRRP and LRS units from the 1960s Cold War and Vietnam War, through their resurgence in the 1980s and use in Operations JUST CAUSE and DESERT STORM, to the advent of the GWOT. The paper's analytical framework examines each era of LRS units in terms of doctrine, organization, training, materiel, leadership, and personnel. In doing so, the author makes a strong case for continuing the LRS capability in the Army's force structure. The variety of environments and enemies likely to be faced by the military in the GWOT continues to demand the unique human intelligence abilities of trained and organized LRS units. As the Army leads the Armed Forces of the United States in combating terrorists where they live, the lessons found in this survey remain timely and relevant.

tracker boat manuals: In My Element Pip Hare, 2024-10-10 'An entertaining and compelling page turner that will stay with you.' Pete Goss The boat picks up another wave and surfs again, faster this time, deafening. My eyes are streaming, sore from the icy wind that throws spray in my face. And over the top of it all I can hear my own laughter. I feel powerful, strong. I am a thousand miles from land in one of the world's most dangerous environments. Alone and free. The Vendée Globe Race is one of the world's toughest sporting events: a single-handed, non-stop lap of the planet, with no assistance. The route takes competitors around the fringes of Antarctica, tackling terrifying conditions in the Southern Ocean before rounding Cape Horn. In My Element is the gripping and uncompromising story of Pip's incredible journey, but it's about so much more than sailing. A thousand miles from land and surviving on only 30 minutes of sleep at a time, with both skipper and vessel relentlessly pushed to the brink of failure, Pip tells it straight, acknowledging that success never comes without mistakes and mishaps and these challenges do not mean defeat; they are opportunities to learn and grow. This, her first book, is both a gripping record of one of her toughest races ever and an inspiring account of the mental and physical strategies that have allowed her to discover, as a middle-aged woman, a life that allows her to live 'in flow' and achieve success. From embracing fear to managing anxiety, enduring the daily grind whilst appreciating the pure magic, pacing yourself and rising to the occasion, Pip's journey teaches the importance of seizing every moment and truly living in your element.
