Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. upco living environment answer key: Qualitative Freedom - Autonomy in Cosmopolitan Responsibility Claus Dierksmeier, 2019-01-18 In the light of growing political and religious fundamentalism, this open access book defends the idea of freedom as paramount for the attempt to find common ethical ground in the age of globality. The book sets out to examine as yet unexhausted ways to boost the resilience of the principle of liberalism. Critically reviewing the last 200 years of the philosophy of freedom, it revises the principle of liberty in order to revive it. It discusses many different aspects that fall under its three main topics: the metaphysics of freedom, quantitative freedom and qualitative freedom. Open societies worldwide have come under increasing pressure in the last decades. The belief that politics and markets fare best when guided by the principle of liberty presently faces multiple challenges such as terrorism, climate warming, inequality, populism, and financial crises. In the view of its critics, the idea of freedom no longer offers adequate guidance to meet these challenges and should be partially corrected or even entirely replaced by countervailing values. Against the reduction of freedom to the merely quantitative question as to how much liberties individuals call their own, this book draws attention to the qualitative concerns which and whose opportunities society should foster. It argues that, correctly understood, the idea of liberty commits us to defend as well as advance the freedom of each and every world citizen.

upco living environment answer key: Modes of Migration Regulation and Control in Europe Jeroen Doomernik, Michael Jandl, 2008 In Europe, immigration is a politically potent issue—especially when it comes to the treatment of asylum seekers and illegal labor immigrants. This volume draws the reader into the complex and contradictory world of migration regulation and control, covering the wide range of different policy approaches that aim to control the entry and residence of non-EU citizens. Revealing the common framework, tendencies, and policy convergences brought about less by design than a common concern about migration's impact on the future of the EU, Modes of Migration Regulation and Control in Europe questions the effectiveness of additional efforts in terms of their fiscal and societal costs. "This important book emphasizes that European countries individually and collectively are converging in their efforts to manage migration."—Philip Martin, University of California, Davis

upco living environment answer key: Religious Disagreement Helen De Cruz, 2018-11-15 This Element examines what we can learn from religious disagreement, focusing on disagreement with possible selves and former selves, the epistemic significance of religious agreement, the problem of disagreements between religious experts, and the significance of philosophy of religion. Helen De Cruz shows how religious beliefs of others constitute significant higher-order evidence. At the same time, she advises that we should not necessarily become agnostic about all religious matters, because our cognitive background colors the way we evaluate evidence. This allows us to maintain religious beliefs in many cases, while nevertheless taking the religious beliefs of others seriously.

upco living environment answer key: Regulation of the Power Sector Ignacio J. Pérez-Arriaga, 2014-02-26 Regulation of the Power Sector is a unified, consistent and comprehensive treatment of the theories and practicalities of regulation in modern power-supply systems. The need for generation to occur at the time of use occasioned by the impracticality of large-scale electricity storage coupled with constant and often unpredictable changes in demand make electricity-supply systems large, dynamic and complex and their regulation a daunting task. Arranged in four parts, this book addresses both traditional regulatory frameworks and also liberalized and re-regulated environments. First, an introduction gives a full characterization of power supply including engineering, economic and regulatory viewpoints. The second part presents the fundamentals of regulation and the third looks at the regulation of particular components of the power sector in detail. Advanced topics and subjects still open or subject to dispute form the content of Part IV. In a sector where regulatory design is the key driver of both the industry efficiency and the returns on investment, Regulation of the Power Sector is directed at regulators, policy decision makers, business managers and researchers. It is a pragmatic text, well-tested by the authors' quarter-century of experience of power systems from around the world. Power system professionals and students at all levels will derive much benefit from the authors' wealth of blended theory and

real-world-derived know-how.

upco living environment answer key: Lakeland: Lakeland Community Heritage Project Inc., 2012-09-18 Lakeland, the historical African American community of College Park, was formed around 1890 on the doorstep of the Maryland Agricultural College, now the University of Maryland, in northern Prince George's County. Located less than 10 miles from Washington, D.C., the community began when the area was largely rural and overwhelmingly populated by European Americans. Lakeland is one of several small, African American communities along the U.S. Route 1 corridor between Washington, D.C., and Laurel, Maryland. With Lakeland's central geographic location and easy access to train and trolley transportation, it became a natural gathering place for African American social and recreational activities, and it thrived until its self-contained uniqueness was undermined by the federal government's urban renewal program and by societal change. The story of Lakeland is the tale of a community that was established and flourished in a segregated society and developed its own institutions and traditions, including the area's only high school for African Americans, built in 1928.

upco living environment answer key: Political Corruption and Organizational Crime Elizangela Valarini, Markus Pohlmann, Subrata Mitra, 2021-10-01 Level of compliance - one of the most important prerequisites of good governance - varies widely across countries of the Global North and the less developed, Global South. Acts of non-compliance, such as electoral irregularities, dubious deals between private and public sectors, questionable role of the justice systems and financial scandals, though they vary greatly across countries, are an omnipresent reality of contemporary life. This volume has brought together a number of case studies of such deviant behavior in political, juridical and corporate fields, from several countries of Asia, Europe and South America, within a common framework. Instead of a moral approach based exclusively on the legality and illegality of the act, the authors of these essays dissect non-compliance analytically, taking culture and context into account. They argue that, while criminal and corrupt dealings deserve to be exposed by all means from an ethical point of view, seen from an interdisciplinary angle, one needs to probe deeper into the dynamic that leads to such non-compliance with the law in the first place.

upco living environment answer key: An Astrobiology Strategy for the Exploration of Mars National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Division on Engineering and Physical Sciences, Space Studies Board, Committee on an Astrobiology Strategy for the Exploration of Mars, 2007-06-26 Three recent developments have greatly increased interest in the search for life on Mars. The first is new information about the Martian environment including evidence of a watery past and the possibility of atmospheric methane. The second is the possibility of microbial viability on Mars. Finally, the Vision for Space Exploration initiative included an explicit directive to search for the evidence of life on Mars. These scientific and political developments led NASA to request the NRC's assistance in formulating an up-to-date integrated astrobiology strategy for Mars exploration. Among other topics, this report presents a review of current knowledge about possible life on Mars; an astrobiological assessment of current Mars missions; a review of Mars-mission planetary protection; and findings and recommendations. The report notes that the greatest increase in understanding of Mars will come from the collection and return to Earth of a well-chosen suite of Martian surface materials.
