Ottman, 2011-02-07 Green products have been around since the 1970s, but it's only in recent years that they've become ubiquitous. Drawing on the latest poll data and incorporating lessons learned from her clients and other leading sustainable brands -- including GE, Nike, Method, Starbucks, Timberland, HP, NatureWorks, Procter & Gamble, Stonyfield Farm, and Wal-Mart -- Ottman provides practical strategies, tools, and inspiration for building every aspect of a credible value-based green marketing strategy. McPherson, author of *Battle Cry of Freedom*). The news of Abraham Lincoln's assassination on April 15, 1865, just days after Confederate surrender, astounded a war-weary nation. Massive crowds turned out for services and ceremonies. Countless expressions of grief and dismay were printed in newspapers and preached in sermons. Public responses to the assassination have been well chronicled, but this book is the first to delve into the personal and intimate responses of everyday people—northerners and southerners, soldiers and civilians, black people and white, men and women, rich and poor. Exploring diaries, letters, and other personal writings penned during the spring and summer of 1865, historian Martha Hodes captures the full range of reactions to the president's death—far more diverse than public expressions would suggest. She tells a story of shock, glee, sorrow, anger, blame, and fear. "'Tis the saddest day in our history," wrote a mournful man. It was "an electric shock to my soul," wrote a woman who had escaped from slavery. "Glorious News!" a Lincoln enemy exulted, while for the black soldiers of the Fifty-Fourth Massachusetts, it was all "too overwhelming, too lamentable, too distressing" to absorb. Longlisted for the National Book Award, *Mourning Lincoln* brings to life a key moment of national uncertainty and confusion, when competing visions of America's future proved irreconcilable and hopes for racial justice in the aftermath of the Civil War slipped from the nation's grasp. Hodes masterfully explores the tragedy of Lincoln's assassination in human terms—terms that continue to stagger and rivet us today.

This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. George Beam argues that all survey research instruments, all types of asking—including polls, face-to-face interviews, and focus groups—produce unreliable and potentially inaccurate results. Because those who rely on survey research only see answers to questions, it is impossible for them, or anyone else, to evaluate the results. They cannot know if the answers correspond to respondents' actual behaviors (objective phenomena) or to their true beliefs and opinions (subjective phenomena). Reliable information can only be acquired by observation, experimentation, multiple sources of data, formal model building and testing, document analysis, and comparison. In fifteen chapters divided into six parts—Ubiquity of Survey Research, The Problem, Asking Instruments, Asking Settings, Askers, and Proper Methods and Research Designs—The Problem with Survey Research demonstrates how asking instruments, settings in which asking and answering take place, and survey researchers themselves skew results and thereby make answers unreliable. The last two chapters and appendices examine observation, other methods of data collection and research designs that may produce accurate or correct information, and shows how reliance on survey research can be overcome, and must be.

bosch nexxt 500 series washer: Poison Candy Elizabeth Parker, Mark Ebner, 2014-02-04 In August 2009, former madam Dalia Dippolito conspired with a hit man to arrange her ex-con husband's murder. Days later, it seemed as if all had gone according to plan. The beautiful, young Dalia came home from her health club to an elaborate crime scene, complete with yellow tape outlining her townhome and police milling about. When Sgt. Frank Ranzie of the Boynton Beach, Florida, police informed her of her husband Michael's apparent murder, the newlywed Dippolito can be seen on surveillance video collapsing into the cop's arms, like any loving wife would—or any wife who was pretending to be loving would. The only thing missing from her performance were actual tears. ... And the only thing missing from the murder scene was an actual murder. Tipped off by one of Dalia's lovers, an undercover detective posing as a hit man met with Dalia to plot her husband's murder while his team planned, then staged the murder scenario—brazenly inviting the reality TV show Cops along for the ride. The Cops video went viral, sparking a media frenzy: twisted tales of illicit drugs, secret boyfriends, sex-for-hire, a cuckolded former con man, and the defense's ludicrous claim that the entire hit had been staged by the intended victim for reality TV fame. In Poison Candy, case prosecutor Elizabeth Parker teams with bestselling crime writer Mark Ebner take you behind and beyond the courtroom scenes with astonishing never-before-revealed facts, whipsaw plot twists, and exclusive photos and details far too lurid for the trial that led to 20 years in state prison for Dalia Dippolito.
