bye bye blackbird lead sheet: Approaching the Standards, Vol 2 Willie Hill, 2000-02 There are two groups of standards that help form the basic repertory used in jazz improvisation. The first group was created by jazz musicians directly from improvisation, experimentation and the analysis of musical forms, ideas and practices that were developed through study and the natural gifts of some of the greatest musicians of the twentieth century. This group codified jazz into chronological styles and provides concrete examples of its styles and concepts. The second group of standards is comprised of compositions written as popular songs during the first half of the twentieth century ... Every improviser is a composer who makes up melodies spontaneously. The model choruses give examples that can be studied, learned, broken into independent phrases and used to create other melodies that reflect more clearly what the improviser wants to say musically ...--Preface

bye bye blackbird lead sheet: The Real Book - Volume II (Songbook) Hal Leonard Corp., 2006-02-01 (Fake Book). The Real Books are the best-selling jazz books of all time. Since the 1970s, musicians have trusted these volumes to get them through every gig, night after night. The problem is that the books were illegally produced and distributed without any copyrights or royalties paid to the master composers who created these musical canons. You won't even notice the difference...the covers look the same, the engravings look the same, the songlist is nearly identical, and the price remains fair even on a musician's salary! But every conscientious musician will appreciate that these books are now produced legally and ethically, benefitting the songwriters that we owe for some of the greatest music ever written! 400 songs, including: Air Mail Special * Birdland * Bye Bye Blackbird * Caravan * Doxy * Fly Me to the Moon (In Other Words) * Georgia * Girl Talk * In Walked Bud * I Remember You * I Thought About You * The Jody Grind * Just the Way You Are * Killer Joe * Little Sunflower * Mercy, Mercy, Mercy * Moanin' * The Nearness of You * Now's the Time * Old Devil Moon * Phase Dance * St. Thomas * Speak Low * Stardust * Tangerine * Tenor Madness * Watch What Happens * Whisper Not * Willow Weep for Me * Yardbird Suite * and more.

bye bye blackbird lead sheet: *Conceptualizing Music* Lawrence M. Zbikowski, 2002-11-14 This book shows how recent work in cognitive science, especially that developed by cognitive linguists and cognitive psychologists, can be used to explain how we understand music. The book focuses on three cognitive processes--categorization, cross-domain mapping, and the use of conceptual models--and explores the part these play in theories of musical organization. The first part of the book provides a detailed overview of the relevant work in cognitive science, framed around specific musical examples. The second part brings this perspective to bear on a number of issues with which music scholarship has often been occupied, including the emergence of musical syntax and its relationship to musical semiosis, the problem of musical ontology, the relationship between words and music in songs, and conceptions of musical form and musical hierarchy. The book will be of interest to music theorists, musicologists, and ethnomusicologists, as well as those with a professional or avocational interest in the application of work in cognitive science to humanistic principles.

bye bye blackbird lead sheet: John Coltrane Plays "Coltrane Changes" (Songbook) John Coltrane, Masaya Yamaguchi, 2003-05-01 (Artist Transcriptions). In the late 1950s, John Coltrane composed or arranged a series of tunes that used chord progressions based on a series of key center movements by thirds, rather than the usual fourths and fifths of standard progressions. This sound is so aurally identifiable and has received so much attention from jazz musicians that it has become known as Coltrane's Changes. This book presents an exploration of his changes by studying 13 of his arrangements, each containing Coltrane's unique harmonic formula. It includes complete solo transcriptions with extensive performance notes for each. Titles include: Body and Soul * But Not for Me * Central Park West * Countdown * Fifth House * Giant Steps * Summertime * and more.

bye bye blackbird lead sheet: Thinking in Jazz Paul F. Berliner, 2009-10-05 A landmark in jazz studies, Thinking in Jazz reveals as never before how musicians, both individually and collectively, learn to improvise. Chronicling leading musicians from their first encounters with jazz to the development of a unique improvisatory voice, Paul Berliner documents the lifetime of preparation that lies behind the skilled improviser's every idea. The product of more than fifteen years of immersion in the jazz world, Thinking in Jazz combines participant observation with detailed musicological analysis, the author's experience as a jazz trumpeter, interpretations of published material by scholars and performers, and, above all, original data from interviews with more than fifty professional musicians: bassists George Duvivier and Rufus Reid; drummers Max Roach, Ronald Shannon Jackson, and Akira Tana; guitarist Emily Remler; pianists Tommy Flanagan and Barry Harris; saxophonists Lou Donaldson, Lee Konitz, and James Moody; trombonist Curtis Fuller; trumpeters Doc Cheatham, Art Farmer, Wynton Marsalis, and Red Rodney; vocalists Carmen Lundy and Vea Williams; and others. Together, the interviews provide insight into the production of jazz by great artists like Betty Carter, Miles Davis, Dizzy Gillespie, Coleman Hawkins, and Charlie Parker. Thinking in Jazz overflows with musical examples from the 1920s to the present, including original transcriptions (keyed to commercial recordings) of collective improvisations by Miles Davis's and John Coltrane's groups. These transcriptions provide additional insight into the structure and creativity of jazz improvisation and represent a remarkable resource for jazz musicians as well as students and educators. Berliner explores the alternative ways—aural, visual, kinetic, verbal, emotional, theoretical, associative—in which these performers conceptualize their music and describes the delicate interplay of soloist and ensemble in collective improvisation. Berliner's skillful integration of data concerning musical development, the rigorous practice and thought artists

devote to jazz outside of performance, and the complexities of composing in the moment leads to a new understanding of jazz improvisation as a language, an aesthetic, and a tradition. This unprecedented journey to the heart of the jazz tradition will fascinate and enlighten musicians, musicologists, and jazz fans alike.

bye bye blackbird lead sheet: Research Handbook on Intellectual Property Licensing

Jacques de Werra, 2013-01-01 'Transactions involving intellectual property whether by way of out-and-out assignment or by one of the myriad variants of licensing which are possible, are really really important – they help the world of business go round. But such transactions can be complex with things like national rules preventing alienation getting in the way of bargains people wish to make. So it is quite astonishing how sparse the literature on the subject is – particularly literature taking a comparative view. This book is perhaps the very first of its kind, taking as it does perspectives from the major legal systems of the world. Moreover its distinguished authors have not written in a technical or abstruse way – as academics (and some judges) can all too easily do. Far from it. This book is readable – and anyone concerned with intellectual property licensing should read it and will find it a pleasure to do so. They will also learn a lot about some of the pitfalls and bear-traps to be found around the world. At UCL we have recognised the importance of this subject. This book will be on our students' reading list.' – The Rt. Hon. Sir Robin Jacob, UCL Faculty of Laws, UK 'IP licensing underpins the information economy. This impressive book brings together leading academic lawyers and practitioners from a range of key jurisdictions to explore a number of major current issues. The book is both thoughtful and practical and it is not afraid to call for greater harmonization of IP licensing law. It is a must have for all those involved in the field.' – Simon Stokes, Blake Lapthorn 'This Research Handbook provides a valuable mix of practical and theoretical perspectives on IP licensing and will serve as a reference resource for scholars and practitioners in this field of study.' – Francesco Parisi, University of Minnesota, US and University of Bologna, Italy 'The Handbook brings together a unique collection of world renowned experts providing detailed discussion in every chapter. The brilliance of this collective work is found in its broad two dimensional focus – beyond patents to all key IP assets on the one hand, and country specific discussion for key regions around the world on the other. . . Whether read cover-to-cover as a compilation of current best practice or used as a true reference guide, the Research Handbook on Intellectual Property Licensing is a must have for anyone seeking to capture value from intangible assets.' – From the foreword by James E. Malackowski The Research Handbook on Intellectual Property Licensing explores the complexities of intellectual property licensing law from a comparative perspective through the opinions of leading experts. This major research tool analyses the features of specific types of licensing agreements and also addresses other practical issues which apply across different types of licensing transactions, such as the treatment of licensing in bankruptcy and the use of arbitration for solving licensing disputes. The Handbook ultimately provides a scholarly contribution to the development of global intellectual property licensing policies. Including transversal and comparative analysis, this Handbook will appeal to intellectual property licensing practitioners, lawyers and intellectual property and contract law academics.
