MacDonald, 2021-05-25 An inspirational, motivational book that chronicles Michael MacDonald's transformation from a scholarship player at Rutgers' high-level Division I basketball program to a highly successful executive at Xerox and then chairman and CEO of Medifast. "From the Bench to the Boardroom, Michael MacDonald shares his journey from his college basketball career at Rutgers to executive positions at Xerox and Medifast. His leadership, work ethic, and persistence, which were on display every step of the way, have made him a valued member of our board at the Jimmy V Foundation." —Mike Krzyzewski, Naismith Hall of Fame coach, Duke University "Mike holds a deep reverence and appreciation for his time at Rutgers, as well as for the opportunities that Rutgers has provided him. As a letterwinner on the Rutgers men's basketball teams in the 1970s, Mike took his student-athlete experience and translated these learned lessons to successes in his career.... His time as a Rutgers student-athlete, alumnus, board member, donor, and father/father-in-law of three Rutgers alumni continues to leave an indelible legacy on our alma mater. I am proud to call him not only a great teammate, but an even better friend." —Marco Battaglia, Rutgers Football All-American and Cincinnati Bengals Player "I believe the combination of an excellent education and participation in highly competitive sports programs provides invaluable preparation for life after school is over. The best sources of knowledge about the benefits of such a background are people who have been there. Mike MacDonald fits the bill. And he is particularly well suited to write about his experiences because of an amazing ability to recollect the details of his formative years. A student athlete at Rutgers, he was part of the school's then outstanding basketball team. He went on to use this and similar pre-college experiences to build an exceptional business career. That's part of his story but those of us who know him well would add that he is the epitome of a 'good man.' I have seen him close up with family, friends, and others for years. He is a great husband, dad, and grandfather, kind and generous, enthusiastic, and always on the go. You will enjoy what he has to say." —Gene Renna, Retired Senior Executive, Exxon Mobil "Mike MacDonald represents the absolute best of Rutgers University and is an inspiration to everyone on campus. From the day I met Mike, he has always made himself available to mentor, guide, and motivate both our student-athletes and our coaching staff. As an alumnus, he has given back generously and led the charge in ensuring that Rutgers continues to be a beacon of higher education. I've always admired his ability to juggle the roles of family man, businessman, and leader in the Rutgers community. His path from Rutgers is a shining example for student-athletes of the future. He has succeeded in every aspect of life and continues to give back to the community that molded him. To give Mike MacDonald the ultimate compliment a coach can give, simply put, he is a winner." —Steve Pikiell, Head Men's Basketball Coach, Rutgers University

If the healthcare system were an emperor, Covid-19 tragically revealed that it had no clothes. Healthcare had to adapt, and quickly—sparking a dramatic acceleration of virtual care, drive-through testing, and home-based services. In the process, old rules were rewritten and, perhaps surprisingly, largely in a good way for patients. To succeed in the post-pandemic world, all of us—patients, caregivers, providers, employers, investors, technologists, and policymakers—need to understand the new healthcare landscape and change our strategies and behaviors accordingly. In *Care After Covid*, practicing physician and business leader Dr. Shantanu Nundy—Chief Medical

Officer of Accolade, which provides technology-enabled health services to Fortune 500 companies as well as small businesses—lays out a comprehensive plan to transform healthcare along three dimensions: Distributed: healthcare will happen where health happens. It will shift from where doctors are to where patients are—at home, in the community, and increasingly on their phones. Digitally enabled: healthcare and the relationships that are central to care will be strengthened by data and technology. It will shift from being siloed to connected, from being episodic to continuous, from one-size-fits-all to more personalized. Decentralized: healthcare decisions and resources will be in the hands of those closest to care. The power to determine who gets care and how they get it will shift away from governments and insurance companies to communities, employers, doctors, and patients. Filled with firsthand insights and stories from the frontlines of healthcare—as well as innovative solutions that were proven effective before and during the pandemic—Care After Covid shows all stakeholders in the healthcare ecosystem exactly what needs to change and, more importantly, how to do it. The time to act is now. We can't afford not to.

da form 5960 fillable pdf: *Mastering Voice Interfaces* Ann Thymé-Gobbel, 2021 We live in a golden age of voice technology. Advances in automatic speech recognition (ASR), natural language processing (NLP) and other technologies have made it extremely viable for people to be talking to machines and getting reasonable answers. Platforms like Amazon Alexa and Google Home, and the associated tools, have made it so anyone can build a voice app, and this is excellent. What we have seen though is that it's fairly easy to build a voice app, but still remarkably difficult to build a great app, one that gets the user what they need, and hopefully the user comes back for more. In *Mastering Voice Interfaces* we want to show you how to build great voice apps. We start with the basics of voice interfaces, and how they are different from others, then dive into basic design principles that we've learned in many years building these apps in the industry. As we cover a design principle, we'll also demonstrate how to implement it with one of the established voice platforms (Google Home), and show how, though the tools are great, you don't have to go too far to have to do some custom work to get what you really want. Well I walk through many design and development techniques that some would view as advanced, but that can make a huge difference in the quality of the app. Readers of *Mastering Voice Interfaces* will come away with a very good understanding of what makes voice interfaces so special, learn the basic design principles for building great voice apps, and how to actually implement those principles and create working apps. What you will learn: What makes voice special and different from other input and output modalities, and why that matters. What the best practices for the various components of the voice-first creation process What are the consequences of design and implementation choices How to create truly great voice apps that users will love Who this book is for We expect readers to have had some exposure to voice apps, at least as users. The book is written for anyone who wants a deeper understanding of the how and why of voice interface design and development. For team of developers, designers, product owners who need a shared understanding of voice interfaces.
