daily commitment peoria: *Building High-Performance People and Organizations* Martha I. Finney, 2008-06-30 Business success depends on employee innovation, drive, skill, endurance, and dedication. Engaged employees, studies show, provide tangible advantages to the organization like greater customer satisfaction and improved profitability. In contrast, the Gallup Organization has discovered that disengaged workers cost U.S. business between \$250 billion and \$350 billion each year. How do you engage employees and, in turn, create the high-performance organization? That's what this set is all about. From the latest theories on motivation to innovations in HR to methods to increase employee retention, it provides the essential insights and tools managers, leaders, and HR people need to find new ways to succeed—while keeping employees happy, productive, and loyal. Employees know that cradle-to-grave—or even week-to-week—employment security is a thing of the past, and that they are at the helm of their own career ship. Discerning consumers in the employment marketplace, they therefore seek employment opportunities that speak not only to their wallets and life circumstances, but also to their desire to find work that provides purpose and passion. How can employers meet these needs and create a team of engaged employees? That's a large question, and one that spans a spectrum of issues that includes career development, human resource management, and the alignment between individual and organizational goals. In these three volumes, leaders and managers will find answers. They feature articles, interviews, and reports from academics, psychologists, managers in the practical corporate world, and experts in career management. Despite what Donald Trump might say, work is personal, and the ways in which individuals navigate the organizational environment—and businesses organize to seek, attract, and retain the best employees—is of primary concern. That goes double in these turbulent times, when

job security is at stake, cynicism rampant, and loyalty at risk. Building High-Performance People and Organizations connects the dots so employers can maintain a loyal, satisfied, and productive workforce. Volume 1: The New Employer-Employee Relationship looks at trends in demographics and the general business environment leading to and driving the concept of employee engagement. Volume 2: The Engaged Workplace: Organizational Strategies focuses on real-world organizational strategies to find, develop, and retain the best employees, with an emphasis on innovative practices in both the U.S. and internationally. Volume 3: Case Studies and Conversations features interviews with thought leaders in the entire landscape of performance management and employee engagement. Their insights will provide readers with the absolute latest thinking in their fields of expertise. Volume 3 also contains short case studies of companies that are pioneering high-performance cultures.

daily commitment peoria: *The Female Advantage* Sally Helgesen, 2011-03-09 Now in Currency paperback -- Sally Helgesen's classic study of female leaders and how their strategies represent a highly successful revision of male leadership styles. Sixty thousand copies in print! In her bestselling 1990 book, Sally Helgesen discovered that men and women approach work in fundamentally different ways. Many of these differences hold distinct advantages for women, who excel at running organizations that foster creativity, cooperation, and intuitive decision-making power, necessities for companies of the twenty-first century. Helgesen's findings reveal that organizations run by women do not take the form of the traditional hierarchical pyramid, but more closely resemble a web, where leaders reach out, not down, to form an interrelating matrix built around a central purpose. The strategy of the web concentrates power at the center by drawing others closer and by creating communities where information sharing is essential. She presents her findings through unique, closely detailed accounts of four successful women business leaders -- Frances Hesselbein of Girl Scouts USA, Barbara Grogan of Western Industrial Contractors, Nancy Badore of Ford Motor Company's Executive Development Center, and Dorothy Brunson of Brunson Communications. Helgesen observes their meetings, listens to their phone calls and conferences, and reads their correspondence. Her diary studies document how women leaders make decisions, schedule their days, gather and disperse information, motivate others, delegate tasks, structure their companies, hire, and fire. She chronicles how their experiences as women -- wives, mothers, friends, sisters, daughters -- contribute to their leadership style.

daily commitment peoria: Race and Rights Dana Elizabeth Weiner, 2013-01-15 In the Old Northwest from 1830 to 1870, a bold set of activists battled slavery and racial prejudice. This book is about their expansive efforts to eradicate southern slavery and its local influence in the contentious milieu of four new states carved out of the Northwest Territory: Illinois, Indiana, Michigan, and Ohio. While the Northwest Ordinance outlawed slavery in the region in 1787, in reality both it and racism continued to exert strong influence in the Old Northwest, as seen in the race-based limitations of civil liberties there. Indeed, these states comprised the central battleground over race and rights in antebellum America, in a time when race's social meaning was deeply infused into all aspects of Americans' lives, and when people struggled to establish political consensus. Antislavery and anti-prejudice activists from a range of institutional bases crossed racial lines as they battled to expand African American rights in this region. Whether they were antislavery lecturers, journalists, or African American leaders of the Black Convention Movement, women or men, they formed associations, wrote publicly to denounce their local racial climate, and gave controversial lectures. In the process, they discovered that they had to fight for their own right to advocate for others. This bracing new history by Dana Elizabeth Weiner is thus not only a history of activism, but also a history of how Old Northwest reformers understood the law and shaped new conceptions of justice and civil liberties. The newest addition to the Mellon-sponsored Early American Places Series, *Race and Rights* will be a much-welcomed contribution to the study of race and social activism in nineteenth-century America.

daily commitment peoria: Centers of the Cancer Universe Donald L. Trump, Eric T. Rosenthal, 2021-10-11 A 2022 Choice Reviews Outstanding Academic Title An important history of the development of cancer centers of excellence and the revolution in cancer treatment. In the 1960s a coalition of concerned citizens, scientists and politicians joined forces to convince the federal government to focus its efforts on conquering cancer. The National Cancer Act of 1971 resulted and was signed into law on December 23, 1971 by President Nixon. The national "War on Cancer," was declared with some leaders naively arguing that the disease would be conquered by the nation's bicentennial—a mere five years in the future. Over the next five decades scientific discoveries demonstrated the great complexity of what had formerly been thought of as a single disease – with the advent of the genetic characterization of cancers, it is now recognized that there are almost an infinite number of cancers as defined by their many genetic mutations. The National Cancer Act established the infrastructure for the designation of centers by the National Cancer Institute (NCI) and these centers have evolved into models of multidisciplinary, collaborative cancer research, treatment and prevention contributing to a reduction in cancer mortality and increase in quality of life and survival that has translated into more than 17 million cancer survivors in the United States in 2021. *Centers of the Cancer Universe: A Half-Century of Progress Against Cancer* tells the story of how cancer research was not front and center at most universities and research institutions before the National Cancer Act of 1971, and why many physicians were reluctant even to treat patients with cancer in the early 20th century. It follows the behind-the-scenes lobbying, resistance and negotiating that preceded signing the Act into law, and how the cancer centers of today came to fruition, and shaped how cancer research, clinical trials and treatment would be conducted.
