foccus questionnaire pdf: Islamic Divorce in North America Julie Macfarlane, 2012-04-30 Policy-makers and the public are increasingly attentive to the role of shari'a in the everyday lives of Western Muslims, with negative associations and public fears growing among their non-Muslim neighbors in the United States and Canada. The most common way North American Muslims relate to shari'a is in their observance of Muslim marriage and divorce rituals; recourse to traditional Islamic marriage and, to a lesser extent, divorce is widespread. Julie Macfarlane has conducted hundreds of interviews with Muslim couples, as well as with religious and community leaders and family conflict professionals. Her book describes how Muslim marriage and divorce processes are used in North America, and what they mean to those who embrace them as a part of their religious and cultural identity. The picture that emerges is of an idiosyncratic private ordering system that reflects a wide range of attitudes towards contemporary family values and changes in gender roles. Some women describe pervasive assumptions about restrictions on their role in the family system, as well as pressure to accept these values and to stay married. Others of both genders describe the gradual modernization of Islamic family traditions - and the subsequent emergence of a Western

shari'a--but a continuing commitment to the rituals of Muslim marriage and divorce in their private lives. Readers will be challenged to consider how the secular state should respond in order to find a balance between state commitment to universal norms and formal equality, and the protection of religious freedom expressed in private religious and cultural practices.

foccus questionnaire pdf: *My Peace I Give You* Dawn Eden, 2012-05-12 Dawn Eden, internationally known speaker and author of the bestselling *The Thrill of the Chaste*, shows how the lives of the saints have given her hope and aided her journey of spiritual healing after childhood sexual abuse. One in four American women and one in six American men report having been sexually abused during childhood and *My Peace I Give You: Healing Sexual Wounds with the Help of the Saints* provides a much-needed resource for spiritual healing from the isolating effects of these wounds. Eden uses her own story as a backdrop to introduce numerous holy people— like Laura Vicuña, Thomas Aquinas and Bernard of Clairvaux—who suffered sexual abuse or sexual inappropriateness, as well as saints such as Ignatius of Loyola who suffered other forms of mistreatment and abandonment. Readers seeking wholeness will discover saints with wounds like their own, whose stories bear witness to the transforming power of grace. Eden explores different dimensions of divine love—sheltering, compassionate, purifying, etc.—to help those sexually wounded in childhood understand their identity in the abiding love of Christ.

foccus questionnaire pdf: Overcoming Pornography Addiction J. Brian Bransfield, 2013 J. Brian Bransfield presents in this book the struggle of internet pornography in the context of the encounter of Jesus with the Woman of Samaria. Many today find themselves in a similar place. They are hungry for Jesus, but continually fall short. Men in particular experience the pain of internet pornography. *Overcoming Pornography Addiction* presents the practical way in which the teaching of the church can move us from sin to grace, from pain to healing, through an honest appraisal of the pain of internet pornography and the wonderful beauty of grace and virtue. Unique to this title is its emphasis on Pope John Paul's theology of the body in regard to the freedom from internet pornography. This work also places the treatment of the topic in the context of a familiar gospel story of Jesus with the woman of Samaria, who herself has suffered much at the hands of many men. Using familiar images, popular teaching, and incorporating an understanding of addiction and human sexuality, this work appreciates the struggle of persons suffering from internet pornography use and recognizes their human dignity and worth. +

foccus questionnaire pdf: Support for all Great Britain: Department for Children, Schools and Families, 2010-01-20 The demographic and social changes of the last 30 or 40 years have been profound and have led to much greater diversity in family patterns. But the evidence is clear that it is strong, stable relationships between adults in the home - parents, grandparents and other caring adults - and among all these adults and the children in a family, that have the biggest impact on children's happiness and healthy development. This Green Paper sets out a wide range of measures

to support all families as they bring up their children and to help families cope with times of stress and difficulty. The Paper's proposals aim to influence factors that can strengthen or weaken family life, such as the choices available about balancing employment with bringing up children; and how welcoming and accessible public services are to families of all kinds. It focuses mostly on supporting family relationships by enabling families to help themselves. It also considers the position of children and other family members when family relationships have broken down. Chapters include: Introduction; families today; what government is already doing to support families and family relationships; bringing up children; building strong family relationships and dealing with relationship pressures and breakdown; family relationships and employment; the role of public services; consultation questions and conclusions.

foccus questionnaire pdf: Education Policy Les Bell, Howard Stevenson, 2006-09-27 The study of educational leadership makes little sense unless it is in relation to who the leaders are, how they are leading, what is being led, and with what effect. Based on the premise that learning is at the heart of leadership and that leaders themselves should be learners, the Leadership for Learning series explores the connections between educational leadership, policy, curriculum, human resources and accountability. Each book in the series approaches its subject matter through a three-fold structure of process, themes and impact. Series Editors - Clive Dimmock, Mark Brundrett and Les Bell As global pressures focus increasing attention on the outcomes of education policy and on their implications for economic prosperity and social citizenship, the experience of each individual learner is decisively shaped by the wider policy environment. However, there is often an underdeveloped understanding of how education policy is formed, what drives it and how it impacts on schools and colleges. This book explicitly makes these connections and links them to the wider challenges of educational leadership in a modern context. Education Policy is divided into three sections, which examine: the development of policy at the levels of the nation state and individual institutions the forces that shape policies with emphasis on human capital theory, citizenship and social justice and accountability research-based case studies highlighting the application of policy in a range of situations. The book provides a valuable resource for students, practitioners, middle managers and educational leaders in all sectors, both in the UK and internationally, who are engaged on masters and doctoral degrees, or undertaking leadership training and preparation programmes.
