golden ticket template willy wonka: Alabama Quilts Mary Elizabeth Johnson Huff, Carole Ann King, 2020-11-03 Winner of the 2022 James F. Sulzby Book Award from the Alabama Historical Association *Alabama Quilts: Wilderness through World War II, 1682–1950* is a look at the quilts of the state from before Alabama was part of the Mississippi Territory through the Second World War—a period of 268 years. The quilts are examined for their cultural context—that is, within the community and time in which they were made, the lives of the makers, and the events for which they were made. Starting as far back as 1682, with a fragment that research indicates could possibly be the oldest quilt in America, the volume covers quilting in Alabama up through 1950. There are seven sections in the book to represent each time period of quilting in Alabama, and each section discusses the particular factors that influenced the appearance of the quilts, such as migration and population patterns, socioeconomic conditions, political climate, lifestyle paradigms, and historic events. Interwoven in this narrative are the stories of individuals associated with certain quilts, as recorded on quilt documentation forms. The book also includes over 265 beautiful photographs of the quilts and their intricate details. To make this book possible, authors Mary Elizabeth Johnson Huff and Carole Ann King worked with libraries, historic homes, museums, and quilt guilds around the state of Alabama, spending days on formal quilt documentation, while also holding lectures across the state and informal “quilt sharings.” The efforts of the authors involved so many community people—from historians, preservationists, librarians, textile historians, local historians, museum curators, and genealogists to quilt guild members, quilt shop owners, and quilt owners—making *Alabama Quilts* not only a celebration of the quilting culture within the state but also the many enthusiasts who have played a role in creating and sustaining this important art.

golden ticket template willy wonka: *Roald Dahl's Marvellous Medicine* Tom Solomon, 2016 Most people know Roald Dahl as a famous writer of children's books and adult short stories, but few are aware of his fascination with medicine. Right from his earliest days to the end of his life, Dahl was intrigued by what doctors do, and why they do it. During his lifetime, he and his family suffered some terrible medical tragedies: Dahl nearly died when his fighter plane went down in World War II; his son had severe brain injury in an accident; and his daughter died of measles infection of the brain. But he also had some medical triumphs: he dragged himself back to health after the plane crash, despite a skull fracture, back injuries, and blindness; he was responsible for inventing a medical device (the Wade-Dahl-Till valve) to treat his son's hydrocephalus (water on the brain), and he taught his first wife Patricia to talk again after a devastating stroke. His medical interactions clearly influenced some of his writing - for example the explosive potions in George's Marvellous Medicine. And sometimes his writing impacted on events in his life - for example the research on neuroanatomy he did for his short story William and Mary later helped him design the valve for treating hydrocephalus. In this unique book, Professor Tom Solomon, who looked after Dahl towards the end of his life, examines Dahl's fascination with medicine. Taking examples from Dahl's life, and illustrated with excerpts from his writing, the book uses Dahl's medical interactions as a starting point to explore some extraordinary areas of medical science. Solomon is an award-winning science communicator, and he effortlessly explains the medical concepts underpinning the stories, in language that everyone can understand. The book is also peppered with anecdotes from Dahl's late night hospital discussions with Solomon, which give new insights into this remarkable man's thinking as his life came to an end.
