guts and bolts brainpop: On the Rocketship Richard Whitmire, 2014-05-15 The face of American education is evolving—and the roadmap is clear *On the Rocketship: How Top Charter Schools are Pushing the Envelope* examines the rise and expansion of leading charter school network Rocketship, revealing the secret sauce that makes a successful program. A strong narrative with a timely message, the book explores how Rocketship started and the difficulties encountered as it expands. Designing schools for children who have been failed by traditional schools is extremely challenging work. Setbacks are inevitable. Later in the book the narrative shifts to the national picture, exploring how high performing charter schools are changing the education landscape in cities such as Denver, Memphis, and Houston. The book emerges just as charter schools are running into stiff political opposition in New York City and elsewhere. Even in San Jose, Rocketship's home base, the pushback against charter schools is gaining speed. *On the Rocketship* becomes a valuable resource for explaining what's at stake in this battle. Lose these schools, in New York, San Jose and other cities, and low-income and minority students lose their best shot at a quality education. Written by a veteran journalist who followed Rocketship through a school year, the book explores some of the factors that make Rocketship and other charters successful, including the blended learning that was pioneered at charter schools, especially Rocketship. Many schools around the country are looking to Rocketship as a model for implementing blended learning. The interplay between charter schools and blended learning is setting a change in motion, and the American education system is ready to evolve. *On the Rocketship* details this phenomenon, providing insights for educators across the nation.

guts and bolts brainpop: The Yellow King RPG (Four 6x9 Slipcase Set) Pelgrane Press, 2020-01-21 Inspired by Robert W. Chambers' influential cycle of short stories, it pits the characters against the reality-altering horror of *The King in Yellow*. This suppressed play, once read, invites madness or a visit from its titular character, an alien ruler intent on invading and remolding our world into a colony of his planet, Carcosa. Four books, served up together in a beautiful slipcase and GM screen set, confront your players with an epic journey into reality horror: Belle Époque Paris, where a printed version of the dread play is first published. Players portray American art students in its absinthe-soaked world, navigating the Parisian demimonde and investigating mysteries involving gargoyles, vampires, and decadent alien royalty. *The Wars*, an alternate reality in which the players take on the role of soldiers bogged down in the great European conflict of 1947. While trying to stay alive on an eerie, shifting battlefield, they investigate supernatural mysteries generated by the occult machinations of the Yellow King and his rebellious daughters. Aftermath, set later in the same reality, in present day North America. A bloody insurrection has toppled a dictatorial regime loyal to Carcosa. Players become former partisans adjusting to ordinary life, trying to build a just society from the ashes of civil war. But not all of the monsters have been thoroughly banished--and like it or not, they're the ones with the skills to hunt them and finish them off.

guts and bolts brainpop: Cthulhu Confidential Pelgrane Press, 2017-07 Cthulhu Confidential is a roleplaying game designed for one player and one game master. Its powered by the GUMSHOE One-2-One game system which retunes, rebuilds and reimagines the acclaimed GUMSHOE investigative rules set, as seen in such hit roleplaying games as *Trail of Cthulhu* and *Nights Black Agents*, for one player and one GM. Together, you create a story that evokes the classic solo protagonist mystery format. Cthulhu Confidential drops your hero into the noir nightscape of hardboiled-era Los Angeles, New York or Washington, DC. Meet powerbrokers and politicians, rub shoulders with Hollywood studio bosses and fiery evangelists. Face narrow-eyed G-Men, bent cops and dangerous crime lords. But beneath it all, under the scrim of all this human endeavor, lives corruption so old and inhuman you'll need all your courage and resourcefulness to face it. Choose one of three heroes with their own settings and adventures: Langston Wright is an African-American war veteran and scholar in WW2-era DC with a keen intellect. Dex Raymond is a hard-boiled private detective in 1930s Los Angeles with a nose for trouble. And Vivian Sinclair is The New York Herald's most determined scoop-hound. Each is a lone investigator, equipped with smarts, fists, and just maybe a code of honor, uncovering their town's secret truths. But what happens when you scratch the veneer of human malfeasance to reveal an eternal evil, the malign, cosmic indifference of HP Lovecraft's Cthulhu Mythos? Made in the U.S.

Eight times the people of this Earth, over vast millennia, built their civilizations. They reached heights we cannot even imagine now: they spoke to the stars, reshaped the creatures of the world, and mastered form and essence. They built cities and machines that have since crumbled to dust, leaving only their vast outlines and barest remnants. This is the Ninth World. The people of the prior worlds are gonescattered, disappeared, or transcended. But their works remain, in the places and devices that still contain some germ of function. The ignorant call these magic, but the wise know that these are our legacy. They are our future. They are the... Two 416-page corebooks, two poster maps, a handsome and sturdy slipcase, a metal medallion, and additional play aids all for the price of the corebooks alone.
